## Problem Solving

### Choose the Operation

Add or subtract to solve.

1. Albert counted 52 movie tapes. The store owner rented 36 of them. How many movie tapes were left?

$$\begin{array}{r} 4\ 12 \\ \cancel{52} \\ - 36 \\ \hline 16 \end{array}$$

16 movie tapes

---

2. Luisa counted 67 music tapes. Her friend Renée counted 14 more. How many music tapes did they count in all? \_\_\_\_\_

\_\_\_\_\_ music tapes

---

3. Jeff has 37 tapes. Keith has 13 tapes. How many more tapes does Jeff have than Keith? \_\_\_\_\_

\_\_\_\_\_ more tapes

---

### Reasoning

Ring the best estimate.

4. Georgia used 11 tapes to fill a box. About how many tapes would she use to fill 4 boxes?

about 30  
about 40  
about 50

# Problem Solving: Choose the Operation

## Answer Key

---

1.  $52 - 36 = 16$ ; 16
2.  $67 + 14 = 81$ ; 81
3.  $37 - 13 = 24$ ; 24
4. about 40
